## Rotary Lobe Pump

From the world leader in pumping technology, NEMO® now manufactures the NETZSCH TORNADO®, a modular designed industrial Rotary Lobe Pump.

Engineered to fit your needs, this pump is capable of handling viscous materials and large solid particles all in a compact, space-saving design. TORNADO® pumps are ideal for space saving installations and skid/trailer mobile applications.

Easy to maintain NETZSCH Rotary Lobe Pumps are used in chemical, municipal/industrial waste water, and food industries.

- Capacities to 3100 GPM
- Pressures to 170 PSI
- Four rotary lobe designs
- Intermittent dry run capabilities
- Positive displacement metered flow
- Low life cycle costs
- Open area between pump housing and timing gear assembly prevents cross contamination
